Meet Mrs. Jackson

I grew up in Topsfield and attended Masconomet Regional High School in Boxford. I graduated from Wheelock College with a B.S. in Elementary Education and Special Education. I received my M.Ed. from Alliant International University in San Diego. I also continue to take a few classes each year and now have more than 70 graduate credits beyond my M.Ed.. I have been teaching school for twenty- nine years. The majority of those years have been spent teaching middle school. I am so pleased to be teaching at Amesbury Middle School. I have a strong interest in technology. I also enjoy running. I love teaching and am looking forward to having a great 2016-2017 school year!

Grading

•Homework is worth 10%.

•Tests/ Quizzes/ and Classwork= 90%

•When I put grades into the computer, classwork will be worth 1, quizzes are worth 2, and tests are worth 3. For example, three classwork assignments will have the weight of one test.

•If a student is out sick and misses an assignment, “M” will be given in the grade book. This stands for MEDICAL. The “M” is calculated by the computer as a zero. It alerts both the teacher and parent that work needs to be made up. The “M” will change to a grade once the work has been turned in.

•A student can receive an “E” in the grade book. This stands for EXEMPT. The “E” is not calculated by the computer. It is as if the assignment never existed for the student.

Curriculum

Math Topics Covered

•Decimals
•Fractions
•Percents
•Ratios and Proportions
•Statistics
•Geometry
•Problem Solving
•Algebra

Classwork

•I am very excited to announce that each student will have their own iPad for classwork.

•This was made possible by AEFI.
