

Explaining the Leadership Template & 14 Leadership Traits

These two items will be our sounding board off of which we will discuss and debate the qualities that define great leaders. We will compare and contrast leadership styles and consider the causal relationships of historical examples.

I chose the 14 Leadership Traits because they were the ones I had learned from age seventeen. If you can find others that would better fit leaders of "today," and can defend your argument intelligently and courteously I am up for the discussion.

The BIG Questions:

What is leadership? Is a leader ever a follower?

What is honor and how does success derive from self-worth?

Does power corrupt? Does absolute power corrupt absolutely?

Why does lying, cheating, and stealing lead to eventual demise?
